Period fo	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filled after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1)	Responsive to communication(s) filed on 28 M	arch 2006.				
	```	action is non-final.	•			
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-30 drawn to a process for preparing an angiotensin converting enzyme inhibitory peptide-containing hydrolysate.

Group II, claim(s) 31-41, drawn to an ACE inhibitory peptide-containing hydrolysate Group III, claim(s) 43-44, drawn to a method of inhibiting ACE activity in a mammal comprising administering to a mammal an effective amount of hydrolysate.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the shared technical feature (an angiotensin converting enzyme inhibitory peptide (ACE) from a plant source) is anticipated by Wu et al (J. Aric. Food Chem. (2001) Vol. 49 Pages 501-506), and therefore is not a special technical feature within the meaning of PCT Rule 13.2. Wu et al disclose ACE inhibitory peptides prepared from soy protein by the action of the enzyme alcalase.

Art Unit: 1654

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Page 3

The species are as follows:

Species represented by the proteolytic enzymes in claim 15 and 28, the species represented by the peptides recited in claims 39-41, other inhibitory peptides not specifically recited in the claims.

- 4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the shared technical feature (an angiotensin converting enzyme inhibitory peptide (ACE) from a plant source) is anticipated by Wu et al (J. Aric. Food Chem. (2001) Vol. 49 Pages 501-506).
- 5. Applicant is required, in reply to this action, to elect a single inventive Group I-III, and elect a completely defined species encompassed by that Group. In Group I, the species of proteolytic enzymes are independent or distinct because they are drawn to proteins from different sources, with varying stabilities and with different substrate specificities, such as Alcalase 2.4L which prefers an uncharged residue in the P1 position. The search for each is not co-extensive particularly with regards to the non-patent literature.

Application/Control Number: 10/538,951

Art Unit: 1654

6. In Group II, the species of inhibitory peptides are independent or distinct because they are drawn to different sequences, which are not overlapping variants of each other and a search for each is not coextensive particularly with regards to the non-patent literature. Applicant is required to elect a single disclosed species of inhibitory peptide to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Page 4

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

## Notice of Possible Rejoinder

7. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

Art Unit: 1654

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hemant Khanna whose telephone number is (571) 272-9045. The examiner can normally be reached on Monday through Friday, 7:30 am-4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cecilia Tsang can be reached on (571) 272-0562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
